

VeDocs ELO

The most comprehensive web publishing system
for medical reports and images

VeDocs ELO portal enables unified web publishing of medical reports and images, from multiple source systems, to patients, ordering physicians and the institution's own medical staff.

Visualize reports and images from anywhere with your mobile device, and gain agility and mobility.

Image Viewer

VeDocs ELO Clinical Viewer provides standard controls, such as navigation through the study's series, without the need to install local applications or plug-ins (no footprint).

For diagnostic tasks, the complete DICOM study is available for download.

Monitoring

VeDocs ELO enables:

- Version control of the reports with easy access to all previous versions
- User access audit: know by whom and when each report version was viewed
- Disabling internet access to reports and images at any time

VeDocs ELO Portal centralizes reports and images from different systems in one place, and delivers this information on the Internet in a safe, practical and easy-to-access way.

Easy access

- Web-based: accessed from any browser (IE, Firefox, Chrome, Safari)
- Accessible from mobile devices (iPad, iPhone, Android)

Benefits

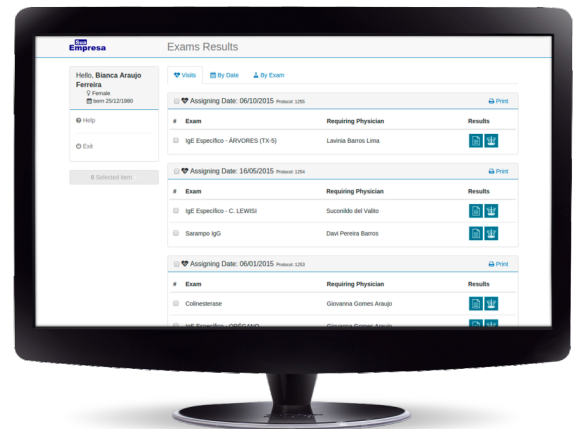

- Convenience to patients with secure internet access to their results
- Convenience to ordering physicians who can access all their patients' exam history on the web
- Cost reduction with a more efficient use of materials and other resources
- Increased recognition with a web portal that can be configured according to your business profile
- Reliability granted by a robust platform built to handle large volumes of information
- Information access rules guaranteed by individual roles and permissions
- Clear view of usage through access audits, reports versioning and storage capacity monitoring
- Automation of task, including automatic sending reports to interested parties, via e-mail or other means

Integration and centralization

- Centralize reports from all diagnostic systems in one place
- Integrate with your PACS, RIS, HIS or LIS via HL7 protocol
- Deliver reports and images at your company's website

Report printing

- Print reports on demand or in batch. Block unfinished services and exams with pending financial issues
- Print reports and images in just one click

Easy access to all patient reports and images history, via a simple and flexible interface.

- Seamless integration to your institution's website
