White**Box**

## Business Intelligence at your fingertips

Accessible, intuitive, robust and compatible with all major databases, WhiteBox has just the tools you need.

WhiteBox allows you to create various types of charts to visualize the data from your multidimensional database.

Transform

Turn your data into valuable information to make better decisions.

Customize

Customize your Dashboards to present the most relevant charts and reports for each individual and circumstance.
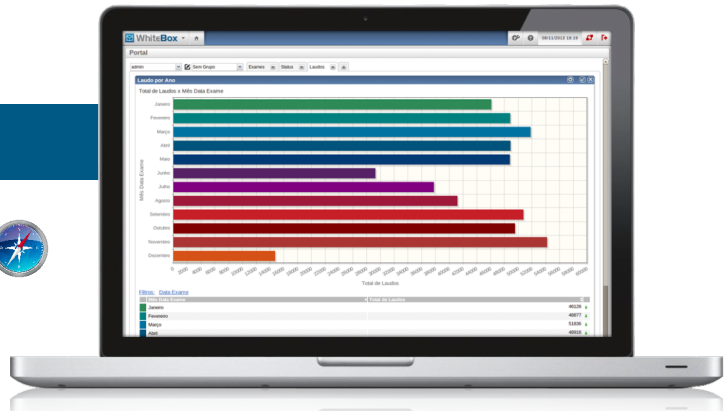

Benefits

- **Support to strategic decision making and process improvement**

- **Agility and ease of access to information**

- **Simple and secure way of sharing your information**

- **Process monitoring and identification of operational problems**

- **Automated ETL and consolidating processes**

- **Cost reduction**

- **Improved quality**

- **Growth and profitability**

Customize your Dashboard to present the most relevant charts and reports, gaining agility and efficiency.

Highlights

- **Web-based:**
  Accessed from any browser (IE, Firefox, Chrome, Safari)

- **Accessible from mobile devices (iPad, iPhone, Android)**

- **Compatible with all major databases (SQL Server, Oracle and PostgreSQL)**

- **No development required to integrate WhiteBox to your database**

- **Extremely intuitive interface that enables end-users to configure customized views**

- **Secure access control to your data based on roles and profiles**

- **Multiple visualization modes, such as: graphs, charts, pivot tables and indicators**

- **Export to image, Excel and PDF**

- **Efficient and easy to use**

Navigate with efficiency and simplicity through WhiteBox reports.

Use the drill down feature to analyze each level of detail of your multidimensional database. You can, for example, visualize medical productivity by month, modality and procedure.
